# TASK 03

## PART A - Coding Practice (Hacker Rank)

Problem | Submissions | Leaderboard | Discussions | Editorial

**Objective**

In this challenge, we will learn some basic concepts of C that will get you started with the language. You will need to use the same syntax to read input and write output in many C challenges. As you work through these problems, review the code stubs to learn about reading from stdin and writing to stdout.

**Task**

This challenge requires you to print $Hello, World!$ on a single line, and then print the already provided input string to stdout. If you are not familiar with C, you may want to read about the printf() command.

**Example**

$s =$ "Life is beautiful"

The required output is:

```
Hello, World!
Life is beautiful
```

**Function Descriptio**

Complete the main() function below.

The main() function has the following input:

- string s: a string

**Prints**

- *two strings: * "Hello, World!" on one line and the input string on the next line.

**Input Format**

There is one line of text, $s$.

**Sample Input 0**

```
Welcome to C programming.
```

```
Welcome to C programming.
```

**Sample Output 0**

```
Hello, World!
Welcome to C programming.
```

Change Theme  Language: C

```c
#include <stdio.h>
#include <string.h>
#include <math.h>
#include <stdlib.h>

int main()
{
    char s[100];

    // Read a full line of input from stdin
    // %[^\n]%*c tells scanf to read everything until a newline
    scanf("%[^\n]%*c", &s);

    // Print the constant string "Hello, World!"
    printf("Hello, World!\n");

    // Print the user-provided input string stored in 's'
    printf("%s", s);

    return 0;
}
```

## Congratulations

You solved this challenge. Would you like to challenge your friends?

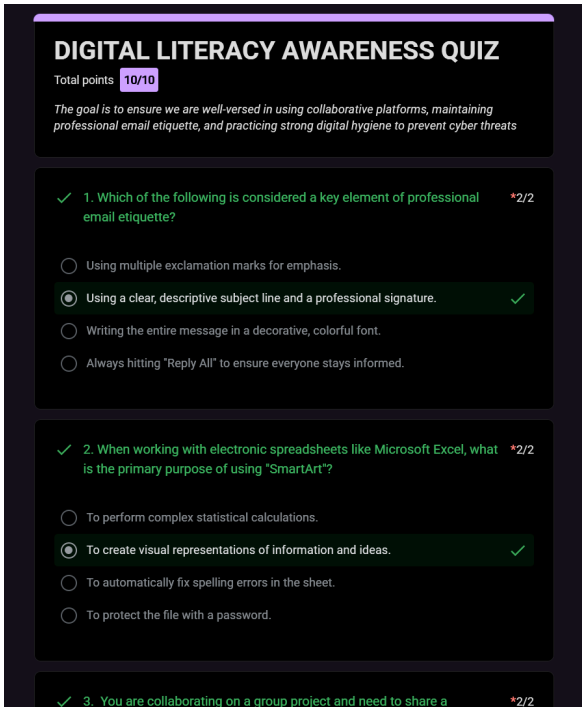
# PART B - Google Workspace Collaboration



DIGITAL LITERACY AWARENESS QUIZ

Total points 10/10

*The goal is to ensure we are well-versed in using collaborative platforms, maintaining professional email etiquette, and practicing strong digital hygiene to prevent cyber threats*

✓ 1. Which of the following is considered a key element of professional email etiquette? *2/2

- Using multiple exclamation marks for emphasis.
- Using a clear, descriptive subject line and a professional signature. ✓
- Writing the entire message in a decorative, colorful font.
- Always hitting "Reply All" to ensure everyone stays informed.

✓ 2. When working with electronic spreadsheets like Microsoft Excel, what is the primary purpose of using "SmartArt"? *2/2

- To perform complex statistical calculations.
- To create visual representations of information and ideas. ✓
- To automatically fix spelling errors in the sheet.
- To protect the file with a password.

✓ 3. You are collaborating on a group project and need to share a *2/2
